

FOR IMMEDIATE RELEASE

## Local Business Provides a Powerful Sales & Marketing Tool

SPRINGFIELD, MO – February 20, 2008 -- [360 Ozarks](#) recently announced their affiliation as a full-service dealer for the **international virtual tour company** Real Tour Vision(TM) (RTV). As a certified provider, 360 Ozark will provide panoramic [virtual tours in Greene county area of Missouri](#). Their virtual home tours leverage the power of the Internet to showcase properties, facilities, products and communities online using an interactive format. The proprietary RTV software system has allowed 360 Ozark to significantly reduce the time normally required to build and post tours online.

“Panoramic virtual tours add an exciting dimension to the presentation of homes, businesses, fitness centers, or other facilities,” said Sharon, owner of 360 Ozarks virtual tour company. “Because they are available 24 hours a day, 7 days a week on the Internet, they can attract global audiences who can view tours at their convenience.

Jason LaVanture, Vice president of RTV, stated, “Sharon was using competing [virtual tour software](#) technology when she first took notice of us. A conversion as we call this is really great when it happens. Not only do we get a polished virtual tour provider but we also convert all of their customers to a better, more reliable technology.”

For more information about RTV Virtual Tours or to inquire about a state-of-the-art virtual tour of your business or listed property, visit their website or reach Sharon by phone at 417-496-1531.
